INTRODUCING THE FIREPLACE COLLECTION 2010

Established and admired for over 25 years, Elgin & Hall's commitment to high quality and design continues. Inspired by traditional and modern values, the 2010 collection boasts stunning designs finished in the finest materials including Marble, Solid Timber and Natural Limestone.

NATURAL WHITE MARBLE

Cool, solid and delicately veined, the timeless beauty of natural marble breathes pure quality. Each surround is unique, bringing natural opulence and appeal into the heart of your home.

MICRO MARBLE

As a natural evolution to marble, Elgin & Hall use micro marble. Small pieces of real marble are finely crushed and bonded together to create beautiful marble finishes.

Pages 3-5

LIMESTONE

Originating from natural sediment rock, our limestone is carefully selected, cut and intricately carved into classically inspired designs.

Each limestone fireplace has its own distinctive variations with soft earthly veining and natural characteristics – meaning each product is totally unique.

Page 6

TIMBER

There is no doubting the rich beauty, warmth and individuality of a solid timber fireplace. With their natural graining and solid good looks it takes the feeling of luxury to a whole new level.

Our timber veneer fireplace provides the same natural look of solid timber but allows careful and individual selection of natural veneers enabling greater flexibility on design and further colour options.

SMARTSENSE LIGHTING SSL

Optional under-mantel LED lights with Smartsense technology are available on selected surrounds*. Look out for the 'SSL' symbol on the product images.

The lights are controlled by a motion sensor – no contact required! Simply brush your hand underneath the lights to switch them on and off.

*Smartsense lights are fitted as standard on the Olivia surround
